

Jurassic World

Can modern 1 _____ still be excited by computer-graphic dinosaurs? It seems they can. Children love dinosaurs, and adults do too. Jurassic World has been a huge success. It is great family entertainment. Just about everyone loves to imagine the history of planet Earth. They also like the excitement and 2 _____ of a dinosaur adventure.

Jurassic World is the fourth movie in a series that started with Jurassic Park. Jurassic Park was a 1993 American science fiction adventure film 3 _____ by Steven Spielberg. The first film was 4 _____ on an imaginary island off Costa Rica where a billionaire and a small team of genetic scientists created a wildlife park of cloned dinosaurs. The new film takes place in the same location 20 years later.

Jurassic World is a 5 _____ dinosaur theme park and has been open for business for around 10 years. The public is becoming bored and the dinosaurs are starting to be seen like elephants or other animals in a zoo. The excitement is gone. The park's scientists are pressured to exploit their 6 _____ research to make the park seem exciting and adventurous. The park's owners need to make more money. So the scientists are doing risky genetic experiments with dinosaurs that eventually creates a monster they cannot control. Chris Pratt is the 7 _____ star. He plays Owen who was hired by Jurassic World to train and research the behaviors of the park's Velociraptor pack. He eventually has to try stop the dinosaur monster from killing many people and destroying the park. Bryce Dallas Howard is Claire Dearing, the park's on-site manager. Together with Claire's two nephews, they form the central 8 _____ of this adventure movie.

The best thing about this movie is that it combines strong acting 9 _____ with the special effects that have made dinosaur movies so popular. The film is like a rollercoaster in which the characters continually have to get out of difficult situations. One of the best 10 _____ is when one of park's employees falls into the raptors cage and Owen risks his life has to rescue him with only his hands and "pet psychology". However, not only is the film scary and thrilling, it is also sunny. There are many funny scenes between Claire and Owen as they develop a relationship.

I would give this film a 11 _____ of eight out of ten. It is an entertaining film suitable for all ages. The viewer experiences many emotions and comes out of the film with a good feeling. Additionally, it is interesting to think about science and the kinds of things that could be created by scientists in the future.
